

Freedom IV+

Also available as "Kit version" to be assembled at final place

The modern, practical solution for bullet-proof guarding facilities that is both portable and permanent, and practicable and user-friendly.

Bullet-Proof Sentry Boxes can be used anywhere. They do not require local infrastructure and have been in use with police and private security organisations since 2004.

They are also ideal for permanent installation outside key public buildings, embassies, official residences, ports/airports and military installations.
